Professional Summary

Automation Engineer and Frontend Developer who designs connected workflows that reduce repetitive work, route information accurately and turn business processes into reliable digital experiences. Experienced with n8n, Zapier, Make, Supabase, webhooks and OpenAI integrations, supported by React and TypeScript skills for building the interfaces through which users access those automations.

Technical Skills

Automation and AI
n8n, Zapier, Make, Voiceflow, Claude Code, OpenAI integrations, webhooks, conditional routing, scheduled workflows, email automation

Backend and Integrations
Supabase, REST APIs, authentication, PostgreSQL RPC functions, Git, GitHub, Vercel, debugging

Frontend
React.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, Vite, React Router, TanStack Query, Axios

Professional Experience

Frontend Developer, *Countryside – BlowPay* 07/2026 – Present

- Develop and enhance an administrative dashboard using React, TypeScript, Vite, Tailwind CSS, Axios and TanStack Query.
- Built API-driven transaction investigation tools with debounced search, multi-criteria filters, pagination and clear-filter controls.
- Created KYC-aware onboarding and login routing based on verification status and new-user conditions.
- Added CSV and PDF exports and designed loading, empty and error states that make support workflows clearer and easier to use.

Frontend Developer Trainee, *The Curve Africa* 05/2025 – 11/2025

- Completed practical training in React.js, JavaScript, HTML, CSS, Git and collaborative frontend development.
- Built and deployed responsive products with designers and backend developers and delivered a hackathon solution under a fixed deadline.

Automation Project

GrowthLens 360, *n8n, Supabase, OpenAI, React, TypeScript, Vercel*

- Built an end-to-end diagnostic platform that compares owner, customer and employee perspectives and converts the findings into prioritised business actions.
- Connected Supabase and n8n to automate invitations, assessment-completion events, AI-assisted report generation, in-app notifications, support routing and action reminders.
- Implemented an authenticated Growth Advisor that uses assessment context, preserves conversation history and provides practical, report-based guidance.

Other Automation Project

Conference Registration and Reminder Automation, *Zapier, Google Forms, Gmail*
Automated attendee capture, session-based routing, confirmation emails and scheduled reminders for a business conference.

Recruitment Communication Automation, *n8n, Email*
Built a workflow that routes applicant data and automates candidate communication across recruitment stages for a logistics company.

Client Onboarding Workflow, *n8n, Trello, Cloud Storage*
Automated project-board creation, onboarding checklists, folder setup and manager notifications to reduce repetitive setup work.

Website FAQ Assistant, *Voiceflow, Knowledge Base*
Built a conversational assistant that uses website content as its knowledge source and answers frequently asked questions.

Claude Code Chatbot Prototype, *Claude Code, Conversational AI*
Built a chatbot prototype with guided responses and a structured conversational flow while developing practical Claude Code skills.

Frontend Projects

Crypto Alert Dashboard, *React, Vite, Tailwind CSS, REST APIs*
Built a responsive cryptocurrency dashboard with live prices, rankings, market movements and external API integration.

RefillExpress, *React, JavaScript, GitHub, Vercel*
Built a responsive gas-ordering platform for browsing vendors, comparing prices and placing orders in a collaborative product team.

Education

BSc Industrial Relations and Personnel Management, *Lagos State University* 2014 – 2019 | Nigeria
Second Class Upper Division (2:1)
